

L'Isle Jourdain, April 1st 2016

Dear Client,

Subject: Modification of the validity period of certificates under the EOS scheme

As you are aware, we carry out, at least once a year, an on-site surveillance audit in order to verify the compliance of your operation and then renew, when applicable, the validity of your certificate to an additional 12 months, starting the date of your last on-site audit. As the surveillance audit must be scheduled between January 1st and December 31th of each year and inspectors plan audits at the most appropriate time in relation with the verifications to be carried out. Therefore depending on the type of your operation, the audit time can vary from year to year.

When the validity of your certificate is about to expire before we are able to finalize the certification renewal process, we used to proceed with the issuance of an extension to your previous certificate. In an effort to reduce the need for a certificate extension, we have decided to amend the actual validity of certificates.

With immediate effect, certificates will now be valid until 31 march of year N+2, N being the year of the ongoing certification process). For illustration purpose, the validity end date of a certificate issued will be March 31st **2018**, if your audit was carried out on July 31st 2016 (instead of July 31st 2017 previously).

The new terms of validity of your certificates does not change anything with regard to the annual surveillance process. Consequently, as in the past, you will have to agree to the visit scheduled by the auditor and go through with your on-site audit during year N.

Please note that Ecocert services and fees are set on an annual basis and consequently are independent from the validity end date of the certificate. In cases where annual payment or items required as part of the renewal process (including updated documentation) are not provided on time, we would like to remind you that the certification of your product and the issuance of export certificates or transaction certificates may be suspended.

We hope that this measure will allow us to avoid the inconvenience associated with the previous extension process. We would like to remind you that you can check the validity of Ecocert EOS certificates at any time on our website <http://www.ecocert.com>.

Best regards,

Aude BONNET

Scheme Manager EOS/NOP
